

## UEZ JetMix Universal Compulsory Mixer

Unbelievably efficient: the Jet Mix. The UEZ Universal compulsory mixer delivers precise, consistent and high-quality mixing. The 4-arm mixing technique (with Turbo cyclone) ensures an intensive and uniform mixing. Special tools have been designed for different materials.

The drum is filled easily and safely through the safety grid. The mixing process can be observed through the open-ended mixing drum. Additional material can even be added effortlessly during the mixing process. The straightforward discharging process is done via a paddle on the drum floor and is easy to dose.

The JET MIX has a stable, compact design and unbelievably high-performance: perfect for tough construction applications.

- Universal UEZ 3-arm mixing technique with turbo whirler and wall scraper (4-arm mixing technique with wall scraper optional)
- Ideal for plasters - Repairing plasters - Readymix self-adhesive plasters - Spray plasters - Glues - Full thermal insulations - Screeds - Dispersions - Refractory cements - Epoxy resins - Repairing grouts - etc.

## Technical data UEZ JetMix

Technical data	UEZ JetMix
Content mixing drum	140 l
Ready-made mixture Grain size	Depending on consistency approx. 80 litres Up to 16 mm
Mixer	Universal UEZ 3-arm mixing technique with turbo whirler and wall scraper (4-arm mixing technique with wall scraper optional) 48 rpm
Motor	Three-phase 400 V / 3.0 kW 16 A
Electricals	400 V motor protection switch and phase changing 16 A
Versions	Mobile with solid rubber wheels Height adjustable
Safety	Automatic shutdown when safety grid opened Discharge protection CE certified
Dimensions	L 800 mm W 700 mm H 1,050 mm
Weight	108 kg
