ZM 50 Compulsory Mixer High Performance in Small Measurements.

UEZ ZM 50 Compulsory Mixer

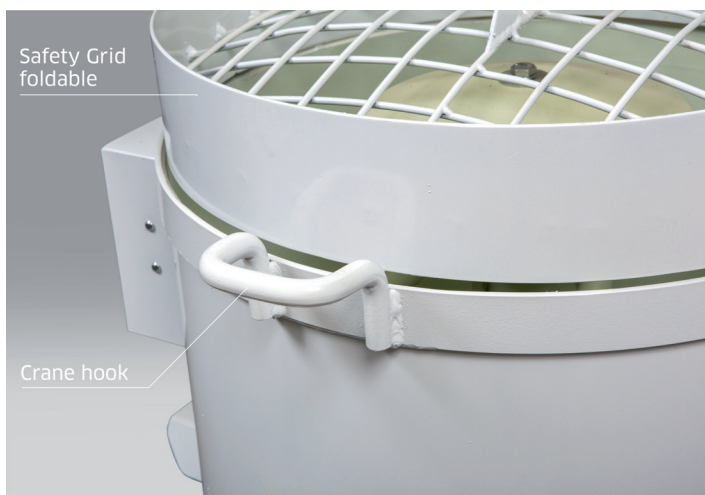

The ZM 50 is a manageable high-capacity mixer. The tried and tested UEZ 4-arm mixer technology ensures rapid, constant and intensive mixing. Material is effortlessly added directly to the mixer drum. The mixing process can be monitored through the open-ended mixer drum.

If required, additional material can easily be added to the mixing drum during the mixing process. A bag opener is fitted to the safety grid. Discharging the mixer drum is easy to dose and is made with a segmental discharge slide on the drum floor.

The ZM 50 is easy to move around thanks to its twin solid rubber wheels. Grommets are fitted for transport by crane. The stable and compact steel construction is designed for everyday tough construction site use. Quality, workmanship and well-proven motor components ensure high durability.

The ZM 50 can also be delivered in a wide version, e.g. for use with a pump.

- Small compulsory mixer with high performance
- 4-arm mixi technology
- 16 mm grain size
- Intensive mixing quality
- Bottom discharging
- Adjustable height
- Maintenance-free
- All-purpose mixer
- Compact and steady construction
- CE certified

Technical data UEZ ZM 50

Technical data	UEZ ZM 50
Content mixing drum	90 l
Ready-made mixture (Fireproof compounds depending on spec. weight)	Depending on consistency/material approx. 30/50 litres Up to max. 16 mm grain size
Discharging	Floor discharge with segmental discharge slide
Mixer	Universal UEZ 4-arm mixing technology with wall scrapers Reinforced mixer with wall scrapers for 16 mm grain size 48 rpm
Motor	230 V 2.0 kW AC 400 V 2.2 kW 3-phase
Electricals	Maintenance-free motor Motor protection switch with phase changing switch 16 A
Available versions	Mobile Height adjustable
Safety	Automatic shutdown when safety grid opened Discharge protection CE certified
Dimensions	L 750 mm W 600 mm H 1,100 mm
Weight	80 kg

Subject to technical changes.
